PLUMBER

earn from **£19,000** to **£55,000**
in Cornwall and the Isles of Scilly

What role do Plumbers play in the Construction & Built Environment Industry?

Plumbers fix, install, and repair pipes that carry water, gas, and waste in homes and businesses. They ensure plumbing systems work well and are safe. Plumbers also support carbon net zero goals by using water conservation methods and installing solar powered hot water systems and heat pumps that reduce our use of fossil fuels. **Find out more here:**

- You'll need basic **MATHS** to calculate water pressure and flow, and angles of slopes for drainage
- **INTERPRETING** building plans and plumbing diagrams is a must
- Plumbers have serious **STAMINA** working in tight spaces, at height or outdoors

Start with a **college course** or **apprenticeship**, then **gain industry experience** to become fully qualified

Once qualified you can work with a company or go self-employed to run your own business. You'll be in big demand either way!

Skilled plumbers can train to become Heat Pump or Building Services Engineers

Funded by
UK Government

Funded by the UK Government through the G7 Legacy Fund. Cornwall Council has been chosen by government as a Lead Authority for the Fund and is responsible for monitoring the progress of projects funded through the G7 Legacy Fund in Cornwall and the Isles of Scilly.
