GROUND- WORKER

earn from **£18,000** to **£45,000**
in Cornwall and the Isles of Scilly

What role do Groundworkers play in the Construction & Built Environment Industry?

Groundworkers prepare construction sites by clearing land, setting foundations, installing drainage, and laying pipes. They ensure the site is safe, level, and ready for building. They need to operate machinery, interpret plans, and work closely with other construction professionals to make sure a project runs efficiently. **Find out more here:**

- You'll use **MATHS** to calculate areas and volumes, and level ground
- **GEOGRAPHY** could also be helpful in understanding soil types and land features
- Groundworkers love being **OUTDOORS...** in all weathers!

Get started with a **college course, an apprenticeship** or by applying **directly to an employer**

You'll need a CSCS card (Construction Skills Certification Scheme) to show you have the right training and safety knowledge to work on a building site.

Groundworkers can upskill to operate heavy machinery or train in leadership to be a site manager!
